

Year 1

Schedule

Year 1 has 2 courses per block (in blocks 1, 2, 4 and 5). There are 4 core courses and 4 electives, and two semester projects.

Core courses

Block 1: Data Mining

Block 2: Model Identification and Data Fitting

Block 4: Algorithms for Big Data

Block 5: Planning and Scheduling

Electives

Block 1: Signal and Image Processing, Mathematical Optimization, Stochastic Decision-Making

Block 2: Advanced Concepts in Machine Learning, Applications of Image and Video Processing

Block 4: Building and Mining Knowledge Graphs, Information Security, Dynamic Game Theory

Block 5: Symbolic Computation and Control, Deep Learning, Information Retrieval and Text Mining, Computer Vision

New Course Page

If you would like to write something about a course that is not yet listed below, please add the page to the appropriate block.
